Lite-Connect – A New Fiber
Solution

July 29, 2014 11:00 a.m. EST

Communicating from a Distance: Fire Alarm Upload/Download

Fire-Lite Alarms offers the capability to transfer data to and from most of its fire alarm control panels for convenient setup or troubleshooting. Typical applications include downloading configuration data to a panel for a new installation, and uploading data from an existing panel to view status, buffer history or capture existing panel configuration files.

Answers to 1500 Top Fire Alarm Technical Questions

The newly revamped FAQ section of the Fire-Lite website (<http://www.firelite.com/en-US/support/faqs/Pages/frequently-asked-questions.aspx>) has been updated and categorized from the 1,500 FAQs that have been present on our website for years. This will aide new and veteran installers with programming, troubleshooting and other questions that may arise when working with Fire-Lite products.
