Detector Placement Gone Seriously Wrong

I've noticed a lot of talk on LinkedIn groups and other social forums recently about common smoke detector location issues, most related to device placement within condos, apartment complexes, dormitories and other commercial facilities where people live and sleep.

Get that Monitoring Job! – Monitoring Assorted Fire Alarm Panels Via IP

You've probably used the UL-listed FireWatch series of IP communicators on existing and new Fire-Lite Alarms control panels, but what do you do when faced with a fire alarm control panel that's not UL-listed with the Firewatch IP communicator?
