

IMPORTANT: *Before installing this product, read the following!*

1. YOU SHOULD CLOSE ALL APPLICATIONS BEFORE PROCEEDING WITH INSTALLATION OF ANY OF THESE PROGRAMMING KITS. This includes anti-virus software, taskbars and any utilities running in the system tray.
2. When the installation browser pops up, select the link to the program you wish to install.
3. Once the individual program's web page loads, select the **Install** button to begin the installation process.
4. When the **File Download** window pops up, select **Open** or **Run** then click **OK**. Do NOT select **Save**.
5. Follow the instructions for each programming kit's installation process.

NOTE: Any user manuals included on this CD-ROM may not be the latest revision. These manuals are provided as a quick reference for users with a slow Internet connection. For the latest revision of these, or any other Fire•Lite user manual, follow the link to the Fire•Lite Alarms website and select the Manuals link.
