

Trim Ring Product Installation Drawing

PN 52583:A 05/06/2005 05-175

Optional Trim Ring Installation

- Open the trim ring hardware kit which contains eight screws and eight drywall anchors.
- Remove the cabinet door by sliding the door upward and off of the pin style hinges.
- Place the trim ring around the cabinet.
- Make certain the hinge cutouts are on the right or hinged side of the cabinet.
- Maintain an equal distance from all four sides of the cabinet.
- Mark the mounting hole centers.
- Remove the trim ring and drill the holes using a 3/16" diameter drill bit.
- Install the supplied drywall anchors into the drilled holes.
- Place the trim ring around the cabinet and secure with the supplied screws.
