411 and 411UD Slave Digital Alarm Communicator

Overview

The Fire-Watch 411 Series from Fire.Lite are compact, multifaceted, slave Digital Alarm Communicator Transmitters (DACTs) designed for a variety of fire, and non-fire applications. The series consists of two models: the 411 and 411UD, providing three and four monitoring channels (inputs) respectively. These slave DACTs are a cost-effective solution for applications that require an existing (or new) Fire Alarm Control Panel to transmit system status to an off-site monitoring facility for Central or Remote Station compliance.
