411UDAC *Fire-Watch™* Fire Alarm Communicator

Overview

The Fire-Watch 411UDAC from Fire•Lite is a compact, multifaceted, stand-alone or slave Fire Alarm Communicator designed for a variety of fire and non-fire applications. It provides four channels (inputs) that accept waterflow devices, two- and four-wire smoke detectors, pull stations, and other normally-open contact devices. The 41UDAC is a cost-effective solution for applications that require an existing (or new) fire alarm control or non-fire control panel to transmit system status to an off-site monitoring facility for Central or Remote Station compliance.
