## Advanced IP Fire Communicator

### Overview

The FireWatch™ Series of IP Communicators are designed to transmit fire alarm system information to central monitoring stations over any standard IP network (i.e. LAN, WAN, DSL, cable, etc.). Fire-Lite's IP Communicators connect to a fire alarm control panel's standard telephone ports, no changes to the panel's existing configuration are required. The Advanced IP Communicator provides exclusive upload/download capabilities. Communicating through a modem at the panel, Fire-Lite's Advanced IP Communicator transmits all information digitally over IP via TCP/IP protocol, secured with the industry's highest level of encryption (AES 512 bit). This fully-digital transmission method eliminates common dropouts in modem communications caused by noise or other factors.

### Where to purchase our products

Find a local [sales office](#) or convenient distributor near you.

### Ordering Information:

- IPDACT-2
- IPDACT-2UD
- 2UD
- IPSPLT
- IPENC
- HP300ULX

For specific part information refer to the data sheet.

### Related Products and Optional Accessories:

- VisorAlarm Plus
- Central Station Monitoring
- MS-9050UD
- MS-9200UDLS
- MS-9600UDLS
- MS-5UD-3
- MS-10UD-7
