## MS-25 25 Point Intelligent Control

### Overview

The MS-25 is a 25-point fire alarm control panel designed to provide a cost-effective addressable solution to meet even the smallest specification. Unlike other small panels, the MS-25 is a full featured, addressable alternative...at a conventional panel price. It runs on only a single loop of standard wire, provides pin-point identification and includes maintenance alerts and auto-programming. The MS-25 supports any combination of its own [HFS detectors and modules](#).
