PRODUCT ANNOUNCEMENT

FireLite Replaces 911AC Digital Alarm Communicator Transmitter with 411 Series

January 26, 2005

Dear Valued Customer,

Please be advised FireLite will discontinue the 911AC DACT by the end of February 2005. This announcement includes the optional D136 Alarm/Trouble Relays and the D5050 programmer.

The direct replacement for the 911 is the Fire•Watch 411 series of DACTS. The 411 series offers many feature improvements over the 911. The three inputs on the 411 or four inputs on the 411UD can be individually programmed to monitor a host control panel for:

- Fire Alarm,
- Fire Trouble
- Fire Supervisory,
- Process Monitoring
- AC Power Loss
- Security Alarm
- Other devices either for fire or non-fire events.

Please call your authorized FireLite distributor for pricing. For further information including a full listing of features and options, please go to www.firelite.com and download datasheet DF-51735.

Sincerely,

A handwritten signature in black ink that reads "Nick Martello".

Nick Martello
