

Product Announcement

New Conventional Panels Released

August 7, 2007
Document FLPA07-08-1

Dear Business Leader,

Fire-Lite is pleased to announce the availability of the UL 864,9th Edition, MS-5UD and MS-10UD series Conventional Fire Alarm Control Panels. The MS-5UD is a five zone panel with built-in communicator and three amp power supply. The MS-10UD is a 10 zone panel with built-in communicator and seven amp power supply.

Both the MS-5UD and MS-10UD panels have integral 80-character LCD display for simple event identification, and are compatible with the System Sensor i3™ series conventional smoke detectors. Programming is easily accomplished from the onboard keypad and both panels will support both local and remote upload/download programming in the near future.
