## Remote Annunciator and Remote Test Station Accessories Released

June 1, 2009

Document FLPA09-06-1

FIRE-LITE is pleased to announce the release of System Sensor's new remote annunciator and remote test station accessories, **RA100Z**, **RTS151**, and **RTS151KEY**. These products replace the current RA400Z, RTS451, and RTS451KEY models respectively.

This new line of remote accessories maintains the same features and functionality as the existing products and are fully backwards compatible. Aesthetically the new products have been updated to incorporate the System Sensor family appearance, similar to the design used for the System Sensor's mini-horns (MHR and MHW). Pricing for the new models will be the same as the existing models, see below for a cross-reference table:

New Model	New Model Description	Existing Model
RA100Z	Remote Annunciator	RA400Z
RTS151	Remote Test Station	RTS451
RTS151KEY	Remote Test Station with Key	RTS451KEY

Limited quantities of the existing products are available and will be sold while supplies last. Once inventory has been depleted Customer Service will automatically substitute any orders for the existing products with the appropriate new model as indicated above.

Please contact your Regional Sales Manager or **FIRE-LITE** Customer Service Representative at [1-800-627-3473](tel:1-800-627-3473) if you have any questions regarding this notice.

Sincerely,

Bill Brosig  
Fire-Lite Product Manager
