

Fire-Lite Alarms Announces System Sensor Multi-Signaling Accessories

Document FLPA09-08-1

FIRE-LITE is pleased to announce the release of System Sensor's new remote annunciator and remote test station accessories, **RTS2**, **RTS2-AOS**, and **AOS**. These products add functionality to the duct smoke detection system by allowing quick, convenient inspections and effective audible and visible notification options. The RTS2 series is designed to work with System Sensor InnovairFlex™ 4-wire conventional duct smoke detectors.

This multi-signaling accessory series comes with many valuable features that can save you time and money. For example, color-coded LED indicators enable you to quickly and easily identify the status of connected duct smoke detector sensors. Status indications include Standby (green), Trouble (amber), Maintenance (amber blink), and Alarm (red). Other valuable features include:

- The ability to discretely monitor two sensors from the same location when 4-wire InnovairFlex duct smoke detectors are configured in a 2:1 set up.
- A key switch that enables you to perform multiple functions from a single location, such as selecting the desired sensor, enabling a test/reset button, and enabling sensitivity reading.
- A convenient sensitivity reading ability with SENS-RDR (sold separately).
- The ability to select a continuous or temporal tone to meet specific application needs.
- An Add-On Strobe (AOS) (included on RTS2-AOS model) to provide visible notification capabilities when required.

The new RTS2 series will replace the current SSK451 and PS24LO models. See below for a cross reference:

New Model	New Model Description	Old Model
RTS2	Multi-Signaling Accessory	SSK451
AOS	Add-on-Strobe	PS24LO
RTS2-AOS	Multi-Signaling Accessory	SSK451 with PS24LO

Limited quantities of the existing products are available and will be sold while supplies last. Once inventory has been depleted Customer Service will automatically substitute any orders for the existing products with the appropriate new model as indicated above.

Please note that the new models are not backwardly compatible with legacy System Sensor duct detectors.

To obtain pricing, ordering and technical information, please contact our FIRE-LITE Customer Service/Technical Service Department: at 1-800-627-3473. For more technical information go to <http://www.firelite.com/datasheets/df-60536.pdf>

Sincerely,

A handwritten signature in black ink that reads "Bill Brosig". The signature is written in a cursive style with a large, prominent initial "B".
