

Product Announcement

New Detector Bases

July 29, 2011
Document FLPA11-07-1

Dear Valued Customer,

Fire-Lite Alarms is pleased to announce the launch of the redesigned 6" flanged **B210LP** and the 4" **B501** detector bases beginning August 1, 2011. These bases have been redesigned to offer more room for wiring and clearer terminal markings to reduce installation time. The 6" flanged base **B210LP** also has a new trim ring that makes performing routine maintenance easier by providing a larger area to grip the detector head for removal – no need to remove the trim ring as well. See the images below for a preview of the redesigned bases. Note that the F110 trim ring (legacy design) will continue to be made available for a limited time to address any installations where consistent aesthetics must be maintained.

In conjunction with this launch, the B350LP will be discontinued and replaced by a generic System Sensor base, similar to our current offering of sounder, isolator and relay bases. The replacement bases have all the same functionality, listings, and compatibilities as the bases they are replacing.

Orders for the legacy bases will continue to be filled as on-hand quantities allow. Once our current inventory of legacy bases has been exhausted all new orders will be converted to the replacement base as listed below:

Intelligent

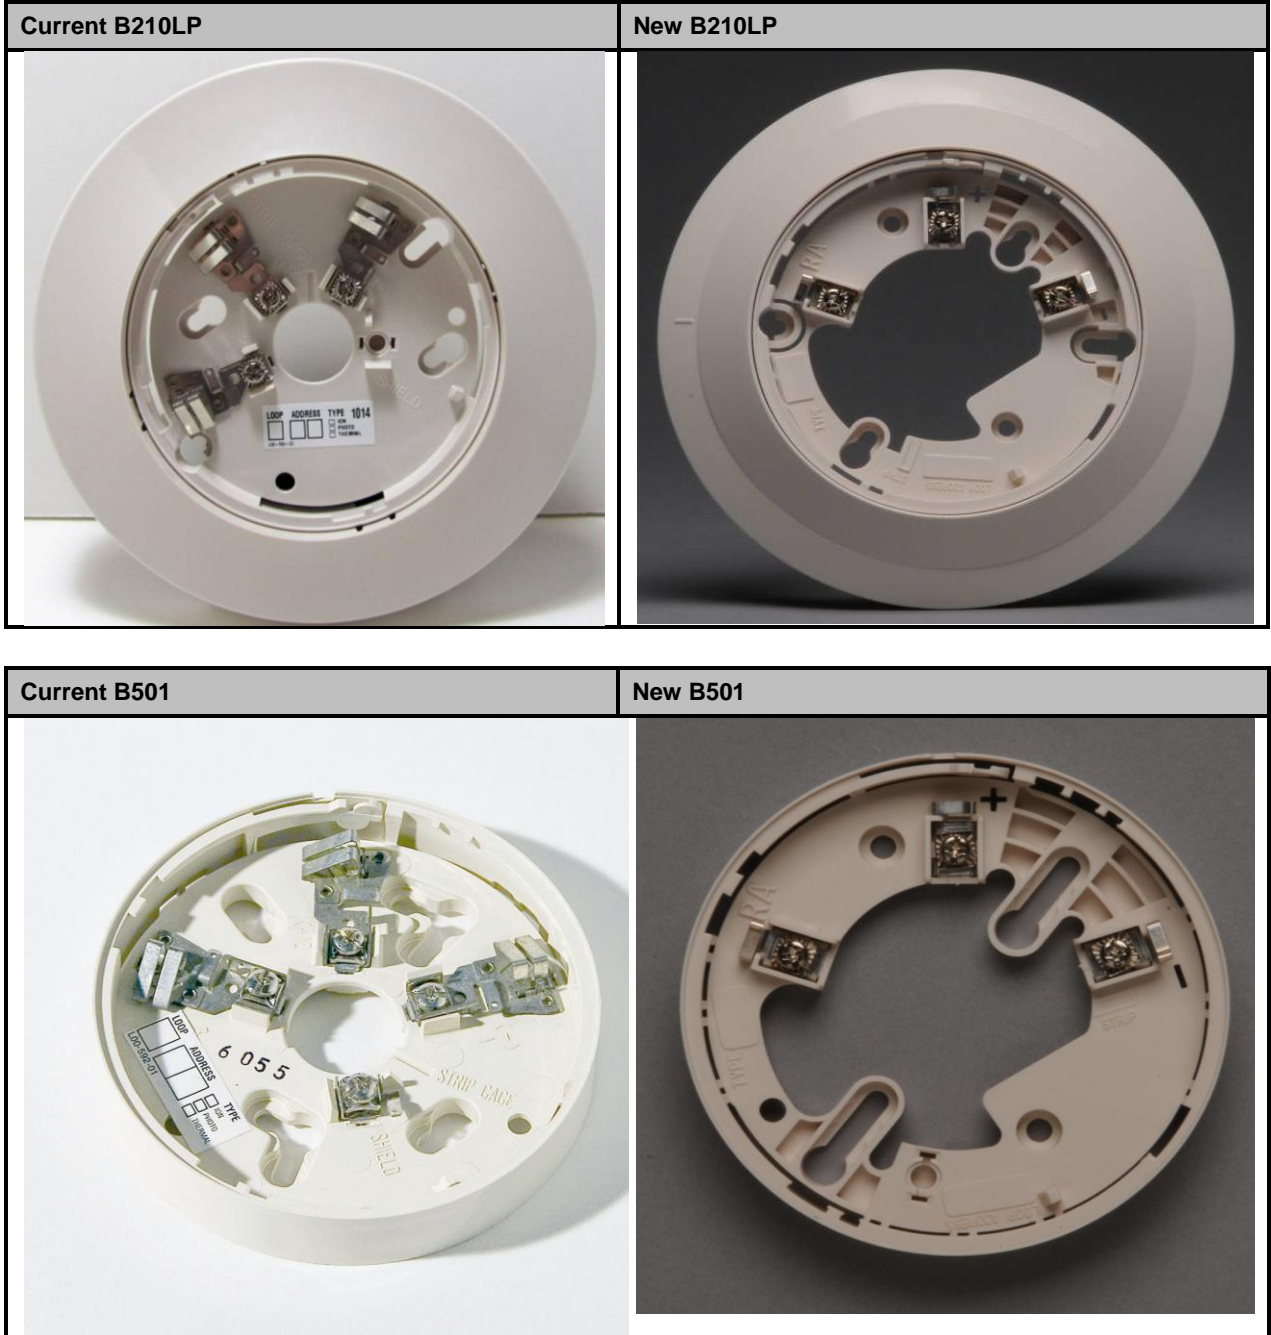

Current Model Number	Replacement Model Number	Replacement Model Description
B350LP	B210LP	6" Flanged Intelligent Detector Base, Low Profile

B210LP Accessories

Model Number	Description
F110	Accessory flange ring for B210LP base (legacy design)
