RE: FC-25/50X to ACC-25/50

June 11, 2004

Dear Valued Customer,

This letter is to advise you that the Fire Command Voice Evacuation panel, FC-25/50X is discontinued effective June 14 and replaced with the new and improved model, the Audio Command Center, ACC-25/50. All new orders for the Fire Command product will be converted to orders for the ACC-25/50.

Introduced in 2003, the ACC-25/50 has been enthusiastically accepted as a significant improvement over the previous model.

The new Audio Command Center provides state-of-the-art, single or dual-circuit (25 watts each) Emergency Voice Evacuation in a single package. The ACC 25/50 is suitable for use as an adjunct (slave or stand-alone) to most UL-Listed Fire Alarm Control Panels. An optional 25-watt, 25 Vrms audio amplifier is available for system expansion to 50 watts (providing dual 25-watt speaker circuits) or as a secondary amplifier in jurisdictions requiring such backup. A 70.7 Vrms converter is also available for independently converting amplifiers to meet retrofit needs. Another version, the ACC 25/50ZS offers even more options including a zone splitter module capable of splitting up to 50 watts of audio power into up to eight speaker circuits.

The ACC product is suitable for Schools, Auditoriums, Dormitories, Theatres, Restaurants, Places of Worship, Lodging, Office Buildings and Factories. For more information on the ACC-25/50, please download data sheet DF-52381 from www.firelite.com. For more information on the ACC-25/50ZS download data sheet DF-52396.

Sincerely,

A handwritten signature in black ink that reads "Nick Martello".
