December 20, 2004

Dear Valued Customer:

This letter is to advise you that several models of our 2 and 4 zone panels will soon be discontinued. While these products have served us well, technology marches forward and we are pleased to provide newer models with vast improvements as substitutions.

The panels listed below will be discontinued on the dates indicated. Please use the table to choose the most appropriate substitute.

WHEN	Discontinued Model	Replaced by:
October 15, 2004	MP-12/MP24/MP-24E	MS-2
September 1, 2004	MS-4412B/MS-4424 (B /BC/BE/C)	MS-4

*Note that both the MS-2 and MS-4 are 24-volt models only.

Along with a host of other features, both of these new products support the new I³ System Sensor conventional input devices and provide built-in NAC synchronization selectable for System Sensor, Wheelock and Gentex protocols.

To learn more about the vast improvements found in either the MS-2 or MS-4 panels, we encourage you to download the appropriate data sheets from www.firelite.com. For the MS-2, please download data sheet DF-52211. For the MS-4, select datasheet DF-52266.

As always, we will continue to provide replacement parts and repair for our discontinued products as long as possible.

Thank you for your continued business.

Sincerely,

A handwritten signature in black ink that reads "Nick Martello".

Nick Martello
FireLite Marketing Director
