 FIRE-LITE® ALARMS
by Honeywell

BG-TR Replaced Effective September 1, 2007

July 27, 2007
Document FLPR07-07-1

Dear Business Partner,

Fire-Lite announces the replacement of the black metal BG-TR with our brand new red polycarbonate BG12TR trim ring.

The BG12TR trim ring allows installers to retrofit applications where a larger pull station was previously installed or where the metal back box protrudes above the surface.

Customers should place last time buys for BG-TR prior to September 1, 2007. After that date, these products will no longer be produced and any orders for BG-TR trim ring will be replaced with the new BG12TR.

Sincerely,

Bill Brosig
Associate Product Manager
