9200UDRB Discontinued

October 22, 2008
Document FLPR08-10-3

Dear Valued Customer,

Due to parts obsolescence, effective immediately the 9200UDRB Master Control Replacement Board has been discontinued. No new orders for 9200UDRB can be accepted.

Fire-Lite will no longer offer replacement boards in the traditional manner for the MS-9200 Series Addressable Fire Panel. Instead, Fire-Lite is requiring replacement with a new MS-9200UDLS system.

Since the entire new Fire-Lite product line uses a common enclosure, future upgrades will not require back box replacement. This reduces labor via simple chassis replacement. With the purchase of an entire new product, the customer is assured of a brand new power supply, the latest door and a UL Ninth Edition label is installed. This process also provides a replacement back box that can be used for new installations.

Please contact your Regional Sales Manager or Fire-Lite Customer Service Representative at 1-800-627-3473, if you have any questions regarding this announcement.

Thank you for your continued business.

Sincerely,

Bill Brosig
Fire-Lite Product Manager
