## PRODUCT RETIREMENT ANNOUNCEMENT

### Sensiscan 2000 Series Replaced By MS-9200UD and MS-9600 addressable Products

March 4, 2005

Dear valued FireLite customer,

As a manufacturer of a complete line of fire products, we periodically evaluate our product line to determine which models represent a low level of need for our customers. We now find many of our customers moving away from large conventional fire alarm products towards our newer addressable line. The addressable products add value as they substantially reduce the wiring and installation costs as well as the maintenance time required to service detectors and peripherals. Additionally, our electronic component suppliers often discontinue items we need to manufacture older products.

With all of the above in mind, FireLite has decided to discontinue our large system conventional panels and associated option modules. Our fixed module annunciators (AFM series) will also be discontinued in favor of our newer, more flexible ACS versions.

We encourage our customers to replace these older products with our newer addressable product lines. FireLite Alarms will make every attempt to provide replacement parts needed for customer support and warranty repair for the next three years or until components are completely unavailable.

Our new addressable products also offer many upgrade paths for your existing conventional end users. For example, FireLite offers compact 10-zone addressable multi-input modules that can monitor multiple conventional zones of detection via the MS-9200UD and MS-9600. For releasing needs, we ask customers to use our MRP 4424 panel.

To assist our customers with any current product needs, we will offer a last time purchase date of April 1, 2005 for all Sensiscan components. Please see the chart on the next page to help you choose an appropriate replacement product.

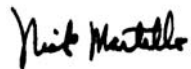

Use the following chart to select a suitable replacement for discontinued items.  
 Customers can choose any addressable replacement panel depending on requirements.

Sensiscan 2000 Components		
PN	Description	Replaced By
BE-2000	Base equipment for Sensiscan 2000	MS-9600
CAB-A3F/B3F	Cabinets	N/A
IZ-4F	Initiating Zone Module	Use addressable multi modules
IZ-8F	Initiating Zone Module	Use addressable multi modules
IZE-AF	Converter Module	Use addressable multi modules
IC-4F	Indicating Circuit Module	Use addressable multi modules
ICE-4F	Indicating Circuit Module Expander	Use addressable multi modules
TC-2F	Time Control Module Single Hazard	MRP-4424
TC-4F	Time Control Module Multiple Hazard	MRP-4424
MPS-24AF	Power supply	N/A
MPS-24BF	Power supply	N/A
APS-6RF	Aux Power supply	N/A
CR-4F/CRE-4F	Control Relay Module and Expander	Use addressable multi modules
EFB-1	Earth Fault Board	N/A
BP-3F	Battery Dress Panel	N/A
TR-A3R and TR-B3R	Cabinet trim rings	N/A
MPM-2	Main Power Meter kit for MPS 24A	N/A
AFM Series	Annunciator Fixed Modules.	ACS Addressable series

For any questions regarding last time purchases, please contact customer service. For any application questions, please contact technical support.

Thank you for your continued business.

Sincerely,

Nick Martello  
 FireLite Marketing Director
