Wingate Inn

1212 South Shackleford Road

Little Rock, AR 72211

Phone: (501) 227-6800

Course is FREE – Click here to [Register Online](#)

You must attend and complete both days of training in order to receive a Certificate of Completion.

Addressable Fire Alarm Control Panels

(NBFA-listed Course 07-1821)

Designed for technicians and sales personnel, this course covers the features, installation, and programming of FireLite's Intelligent, Addressable Control Panels. This 12-hour course includes a hands-on practical exercise in wiring, programming and troubleshooting an addressable system.

Prerequisites: Individuals should be familiar with basic fire alarm and system terminology or attend the Basic Fire Technology class prior to attending this class.

Products Discussed: MS-9050UD, MS9200UDLS and the MS-9600 Intelligent Addressable Fire Alarm Control Panels.

Troubleshooting Fire Alarm Systems

(NBFA-listed Course 07-1816)

This two-hour course is for individuals with up to several years experience in the installation and servicing of fire alarm systems. The course covers the various types of conditions that can cause problems with a fire alarm control panel. Subjects covered include ground faults, electrical noise, improper maintenance and poor design. It also addresses false alarm reduction issues.

IPDACT Internet Communicator

This two-hour course covers the IPDACT - a simple communications device that allows the transmission of alarms generated by a fire alarm control panel through any kind of Internet Protocol (IP) network (ADSL, Cable, ..), while keeping the standard telephone line as a back-up means of transmission. This solution eliminates the need for a second phone and results in faster and more flexible means of supervising a fire alarm system. The course includes a hands-on exercise in the installation and configuration of the IPDACT. ***A laptop is recommended for the IPDACT portion of this class. The laptop should not have Windows Vista and needs a serial port or USB to serial port converter.***

Prerequisites: Individuals should be familiar with basic fire alarm and system terminology prior to attending this class.

You MUST register online at www.firelite.com no later than Thursday, August 3rd.

Registrations submitted after August 3rd will not be given pre-registered status but will be considered walk-ins. Space or Literature may not be available for walk-ins. Due to popular demand, Fire•Lite reserves the right to limit the number of attendees per company if necessary. Fire•Lite cannot accept registrations once a class is marked "FULL." Refer to the web site for class status.
