MiniScan Academy (3 Days)

This three-day course covers Fire•Lite's entire UL 9th Edition product line from the newest conventional fire alarm panel to the line of addressable, intelligent systems. Topics covered are the features sets, installation methods, programming and troubleshooting of these systems. Included are practical hands-on exercises working with an addressable system, voice evacuation and Central Station reporting.

You MUST attend all three days to be eligible for a certificate of completion.

Prerequisites: Individuals should be familiar with basic fire alarm and system terminology or attend the Basic Fire Alarm Technology class prior to attending this class.

Products Discussed: 2-10 zone conventional fire alarm panels, MRP-2001, MRP-2002 Fire Suppression Systems, the MS-9050UD, MS9200UDLS and the MS-9600 Intelligent Addressable Fire Alarm Control Panels. This course also covers the IPDACT internet communicator and the ACC-25/50 Audio Command Center. ***A laptop is recommended for the IPDACT portion of this class. The laptop should not have Windows Vista and needs a serial port or USB to serial port converter***

You MUST register online at www.firelite.com no later than Thursday, August 21st. Registrations submitted after August 21st will not be given pre-registered status but will be considered walk-ins. Space or Literature may not be available for walk-ins. Due to popular demand, Fire•Lite reserves the right to limit the number of attendees per company if necessary. Fire•Lite cannot accept registrations once a class is marked "FULL." Refer to the web site for class status.
