

**Product Announcement: New LTE / IP Dual Path Commercial Fire Alarm Communicators
 June 2019**

Fire-Lite Alarms is pleased to announce the availability of a new line of dual path LTE / IP fire alarm communicators known as the HWF2-COM Series that replace the IPGSM-4G. The HWF2-COM Series includes a Verizon model (available now) and AT&T model (coming soon) that operate over LTE cellular networks and are compatible with any brand of fire alarm control panel (FACP). The Honeywell HWF2-COM Series provides the most complete and versatile solution for commercial fire alarm communications.

MODEL NO.	DESCRIPTION	NOTES	AVAILABILITY
HWF2V-COM	LTE/IP DUAL PATH COMMERCIAL FIRE ALARM COMMUNICATOR (VERIZON)	REPLACES IPGSM-4G	AVAILABLE NOW!
HWF2A-COM	LTE/IP DUAL PATH COMMERCIAL FIRE ALARM COMMUNICATOR (AT&T)	REPLACES IPGSM-4G	COMING SOON
CELL-ANT3DB	CELL ANTENNA FOR HWF2-COM SERIES & IPGSM-4G FIRE ALARM COMMUNICATORS	REPLACES GSM-ANT3DB	AVAILABLE NOW!

The HWF2-COM Series eliminates the need for two costly phone lines providing money-saving solutions for dealers and end-users while the LTE connectivity ensures a long-term solution to meet NFPA 72, UL, CSFM and FDNY requirements.

The selectable reporting path feature allows the radios to be configured for single or dual path, while providing appropriate supervision intervals based on NFPA 72 requirements. End-users can choose between three selectable reporting paths which include LTE cellular only, IP only, or IP primary with LTE cellular backup. Supervision timing intervals include 5 minutes, 60 minutes, 6 hours, and 24 hours.

Contact your preferred Honeywell authorized security equipment distributor for ordering and pricing information and visit firelite.com for more information.

We appreciate your business and continued support of Fire-Lite Alarms products.
