Product Announcement: New CLSS-Enabled LTE Commercial Fire Alarm Communicators
May 2021

Honeywell Fire Solutions is excited to announce a new addition to our lineup of fire alarm communicators enabled by cooperation with Telguard® and turbocharged by Honeywell Forge. The Honeywell HW-TG7L Series of LTE fire communicators offer all of the same features as Telguard’s TG-7FS LTE models with the added functionality of Honeywell’s powerful Connected Life Safety Services (CLSS) cloud solutions.

Communicator Features

- Transmits alarm signals from the fire panel over the digital cellular network to the designated monitoring station
- Certified for use on AT&T and Verizon Wireless LTE networks
- Compliant with NFPA 72 2019 and earlier editions
- Sole, primary, or backup path communications
- 5- or 60-minute supervision modes (180 seconds is available in Canada)
- Supports Contact ID, SIA2, pulse (3x1, 4x2), modem IIe, IIIa², and DMP
- Transmits fire alarm signals through the Telguard Communication Center
- Available for use in the U.S. and Canada (AT&T model only)

Software Features*

- **CLSS Site Manager** provides a “bird’s eye” view of all your accounts and real-time information on event generation so you can diagnose before dispatch. Reduce unnecessary trips & improve your first-time fix rate.
- **CLSS Facility Manager** provides your end users with event alerts via browser or mobile app and access to asset information across multiple sites.
- Included at no charge with the purchase of Telguard monthly service!

**Only available when using Contact ID reporting format*

MODEL NO.	DESCRIPTION
HW-TG7LAF02	CLSS-ENABLED LTE COMMERCIAL FIRE ALARM COMMUNICATOR (AT&T)
HW-TG7LVF02	CLSS-ENABLED LTE COMMERCIAL FIRE ALARM COMMUNICATOR (VERIZON WIRELESS)
