Product Announcement: SWIFT® Wireless AV Notification – Wall Bases August 2019

System Sensor is pleased to announce the addition of wireless bases for wall-mounted AV appliances to the SWIFT® product family. These new wireless AV bases expand on the existing SWIFT (smart wireless integrated fire technology) AV product offering providing options for installing wireless audible visible notification on ceilings and now walls. SWIFT AV bases are compatible with System Sensor L-Series AV notification appliances providing a simple and convenient solution to turn standard wired AV notification appliances wireless when needed.

SWIFT systems seamlessly integrate and synchronize visibly and audibly with existing wired installations and provide a unique level of reliability enabled by smart true mesh technology. With redundant paths of communication at all times, SWIFT ensures a class A system and reliability where it matters most.

SWIFT AV bases are compatible with current Fire-Lite and Silent Knight addressable fire alarm control panels and work with all existing SWIFT installations offering a robust solution for conquering challenging obstructions associated with traditional wired installations.
