General

The Honeywell HFS-DPR(A) intelligent plug-in smoke detector with integral communication provides point location for alarm communication and selective maintenance.

The Honeywell HFS-DPR(A) photoelectric detector’s unique optical sensing chamber is engineered to sense smoke produced by a wide range of combustion sources. The HFS-DPR(A) is specifically a remote test capable detector for use with the HFS-D(A) duct smoke detector. Detector sensitivity can be programmed in the control panel software. Sensitivity is continuously monitored and reported to the panel. Point ID capability allows each detector address to be set with easy-to-use rotary code switches to provide exact detector locations for selective maintenance when chamber contamination reaches an unacceptable level.
