ECC-LOC
Local Operator Console

General
Firelite’s ECC-LOC is an optional Local Operator Console that is compatible with the ECC-50/100(E) Emergency Command Center for fire protection applications and mass notification. It is part of a family of external remote consoles that allows for extending the ECC-50/100(E) display and control to remote locations within a building. It consists of a complete operator interface that is identical to the ECC-50/100 main console as well as a built-in microphone with a push-to-talk feature for ALL CALL paging. It is housed in a cabinet with a keyed or an optional thumb lock to prevent unauthorized access. The local operator console requires an external data bus connection, an external audio riser connection, and an external operator interface power connection (24 Volts DC) from the ECC-50/100 main console.
